

## Work Management Australia partners with MediaValet

Work Management Australia is pleased to announce a new partnership with MediaValet

[MediaValet](#) is the first 100% cloud-based, enterprise-class digital asset management (DAM) system on the planet with the largest data centre footprint.

Since its debut in 2010, it continues to lead the rapidly growing cloud-based digital asset management industry. Today, they compete and win against industry titans, like OpenText and Adobe and also win customers through its ability to integrate to solutions such as [Workfront](#).

**Local, trusted partner support:** [Work Management Australia](#) has partnered with MediaValet due to its strength in mid-market customers who need unlimited users and unique capabilities like 3D file management, AI-supported search and an industry-leading open REST API for any integration needs.

### Workfront and MediaValet

**Connect MediaValet with Workfront to:** - Scale content creation with digital workflows, approvals and automation; streamline collaboration on projects with a single source for creative assets; and standardize asset workflows and automate asset related alerts and approvals.

### Why MediaValet?

**Scaling DAM with unlimited users:** MediaValet offers unlimited users allowing customers to scale DAM both inside (marketing, sales, training etc.) and outside (partners, agencies, resellers, distributors etc) their organization without incurring additional per-seat costs.

**Data residency assurance with Azure:** MediaValet lives on Microsoft Azure data centers which cover the broadest set of regions of any public cloud provider. This means that we can guarantee data residency to most of our customers for whom this is a key requirement based on their industry and local regulations.

**Cost and UX comparison to alt solutions like Adobe AEM:** Customers can get an enterprise-grade DAM up and running for a fraction of the cost (license and implementation) compared to alternative solutions like Adobe AEM and don't have to worry about not understanding how to leverage the features with a simple, easy-to-use UX

**ROI and Time to Go-Live:** MediaValet users give high marks for a quick pay-back period and short time to go-live compared to competitors as shown in the [G2 Crowd Comparison report](#)
